

Agenda

Oil and Gas Stakeholders Group

Oil and Gas Maintenance, Startup and Shutdown (MSS)

Purpose

The purpose of the stakeholders meetings is for TCEQ to obtain stakeholder views on an authorization mechanism for MSS activities at oil and gas sites. TCEQ will consider the information discussed at these meetings, as the agency begins work on proposed requirements to ensure emissions are protective of public health and welfare. These meetings are intended to provide an opportunity for open dialogue and exchange among all participants.

Agenda

Welcome and Introductions

Opening Remarks –

- Why are we here?
- Where are we in the rule making process?
- General timeline
- Future stakeholder opportunities

Key Issues –

These are the MSS activities we know about but need more details. We will discuss these at the meetings, and ask that stakeholders share information about how they conduct MSS activities at their sites. Additionally, we will ask for information on any other MSS activities not already identified.

- Blowdowns of various equipment
- Maintenance performed on tanks and vessels
- Engine or turbine maintenance
- Piping and pipelines maintenance
- Miscellaneous and other maintenance activities not on this list
- Records companies already keep which could demonstrate use of best management practices
